DISASSEMBLY INSTRUCTIONS

1. Remove CABINET (Top)

Insert a metal rod into the hole A of the CAP as shown in Fig. 1 and remove the CAP, and remove screws (4).

2. Remove BASE-ASSY. (Bottom)

Remove nine screws as shown in Fig. 2.

3. Removing PANEL-ASSY (Front)

- (1) Remove the screws (4) as shown in Fig. 3.
- (2) Remove two set screws on top and bottom of the panel, total four screws.
- (3) Loosen the set screw fixing KNOB-METAL (TUNING) by means of a hexagonal wrench of 2 mm in width, and remove KNOB.
- (4) Pull off all the remaining knobs.

4. Remove the coupler of SW-ROTARY (S6, S7). (Inside)

As shown in the exploded view of the cabinet attached to the end of the manual, the SW-ROTARY (S6, S7) is separated into three parts when the coupler is removed.

a. Disassembly

- The wire and SW slide are connected by the part (A) shown in Fig. 4 and 5. Disconnect that part.
- Insert a thin screwdriver into the part (B) shown in Fig. 4 and 5, and remove the part (A) to one side as shown in Fig. 4. Then, hold the floated part (C), and insert the screwdriver tip into the clearance of the part (D) and push it up to remove it. Remove in the same manner for the ROTARY portion of the switch.

b. Assembly

- Turn the knob of SW-ROTARY fully counter-clockwise to set it to the position of the part (A) in Fig. 6 (closest to rear panel).
- Move the movable part on the SW slide toward the rear panel and connect it.
- After connecting, check SW operation.

5. Removing METER

- (1) Remove two set screws securing the meter, and remove HOLDER-U.
- (2) Pull the meter backwards to detach the double adhesive tape on the front side of the meter and then the meter can be removed. (When the front panel has been removed, push the front side of the meter with both thumbs.)
